Work Experience

Lead Software Engineer – Persistent Systems (formerly SCI Fusion360) October 2021 – Present

- Designed, developed, tested, and maintained Java applications supporting banking and mortgage reporting.
- Built a Java reporting system to process database records and generate monthly mortgage reports.
- Developed a Java database utility to identify and remove outdated records, improving performance.
- Created and maintained a Gradle build and deployment pipeline for test environments.
- Performed application maintenance, debugging, and performance improvements across Java services.
- Applied development best practices, including modular design, Git version control, and testing.
- Independently delivered end-to-end solutions from requirements through deployment.

Associate Software Developer – SCI Fusion360 January 2019 – October 2021

- Resolved defects and maintained applications for banking clients using Financial Transaction Manager.
- Expanded JUnit unit test coverage for BBT's internal Zelle support application.
- Implemented cost-effective mobile application enhancements for a retail marketing client.
- Contributed to Agile workflows, including prioritization, iterative development, and team collaboration.
- Provided debugging, troubleshooting, and technical support across multiple client projects.

Teaching Assistant – Clemson University School of Computing August 2017 – December 2018

- Led Algorithms and Data Structures lab sessions, reinforcing programming and problem-solving concepts.
- Assisted students during office hours with debugging, data structures, and algorithms.
- Graded programming assignments, papers, and exams with technical feedback.
- Helped faculty develop lab materials and lesson plans.

Skills and Certifications

- Professional Scrum Master I issued by Scrum.org
- Playwright 101 and Selenium Java 101 issued by LambdaTest
- Skilled in full-stack development including Java, C++, JavaScript, SQL, Python.
- Knowledgeable with source version control systems, defect tracking, and documentation.
- Training in and experience with Agile methodology.
- Strong communication skills and ability to work in teams.
- Committed to continuous learning and professional development.

Education

Master of Science, Computer Science
Clemson University

December 2018

Bachelor of Science, Computer Science
Clemson University

May 2017
